Who We Are

ASAT is committed to improving the education, treatment, and care of people with autism. Many treatments are too quickly adopted by professionals, too readily sensationalized by the media, and too hastily embraced by hopeful consumers in the absence of support for their effectiveness or safety. ASAT provides free information via our website and a quarterly newsletter, *Science in Autism Treatment*, for all interested individuals. Please visit us at: asatonline.org and facebook.com/asatonline.

For the past 50 years, **HOPES CAP, Inc.** has been providing quality community services that respond to the current social, educational and training needs of low income individuals in an effort to overcome barriers to economic self-sufficiency and fight the causes of poverty. Children with autism and other special needs receive services through the Early Head Start Program and then through the Head Start/ Early Childhood Program. Please visit us at: hopes.org and facebook.com/HOPESCAPInc.
