

8 REASONS TO DONATE

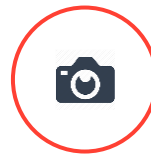

1. Every year, more and more treatments are proposed for autism. Parents are often overwhelmed with what to do and where to turn for good information. ASAT helps parents and other consumers separate the wheat from the chaff.

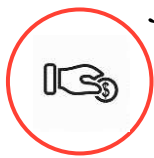

5. We are reaching out around the world. Currently, we have subscribers from over 100 countries and flyers translated into 18 languages. With your support we can reach more individuals outside North America.

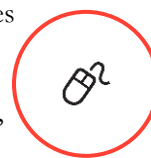

2. Simply type in "autism treatment" and see what comes up in your internet search. Against a backdrop of ads promising the moon, ASAT is a "go to" source of high-quality information.

6. ASAT showcases accuracy and combats unsubstantiated and inaccurate claims of effective treatment in the media through our Media Watch efforts.

3. As ASAT has little overhead, nearly every penny goes toward spreading our message that science matters. Along with ASAT's part-time Executive Director, Board members, Advisory Board members, Externs, and other volunteers generously provide time and expertise because they are committed to science.

7. We maintain a comprehensive website that features Clinical Corner, Consumer Corner, interviews, article synopses, treatment summaries, book reviews, and more. With your help, we can continue to provide up-to-date information about science-based intervention.

4. *Science in Autism Treatment* (SIAT) is an information-packed, monthly publication - completely free, and with your generous donation we can keep it that way! *SIAT* subscribers include over 13,000 parents, teachers, students, and researchers. Help us reach additional subscribers next year.

8. Time is of the essence for families of newly diagnosed children. ASAT can be a guiding light in a long journey of ongoing treatment decisions. Your financial support will enable us to continue to provide information, insights, and strategies to parents and professionals alike.
